MATH1003 Linear Algebra

Instructor: Dr. Xinwei Du
Faculty of Science and Technology
Beijing Normal-Hong Kong Baptist University

Instructor and TA information

- Instructor: Dr. Xinwei Du
  - xinweidu@bnbu.edu.cn
  - T6-302-R9

- TA: Ms. Ziyuan Liu and Mr. Qingshan Wang
- To be updated

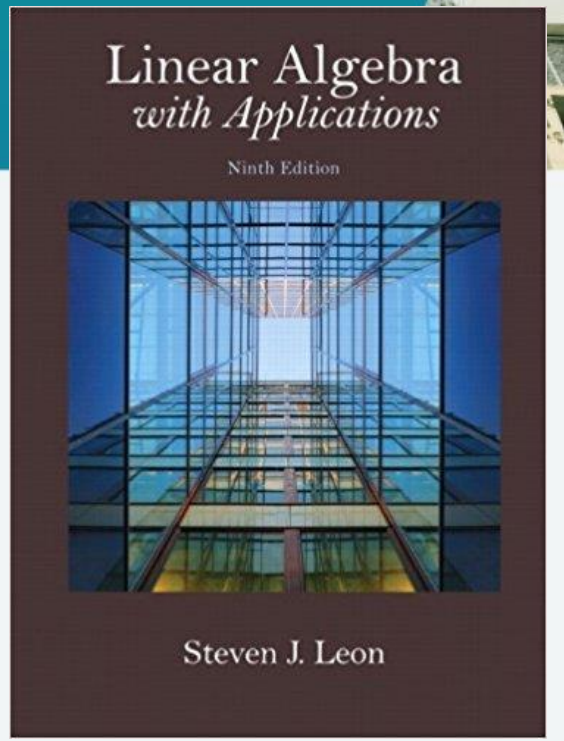

Timetable

Timetable for 2026-2027 Semester 1

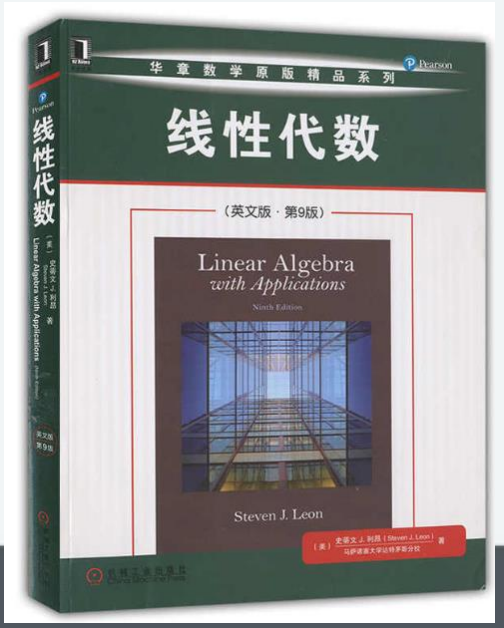

Time	Monday	Tuesday	Wednesday	Thursday	Friday
09:00 - 09:50		Office Hour *UG Meeting*		Office Hour	Office Hour
10:00 - 10:50		Office Hour *UG Meeting*		Linear Algebra (CDS) T5-202	Office Hour
11:00 - 11:50				Linear Algebra (CDS) T5-202	
12:00 - 12:50			*LUNCH BREAK*		
13:00 - 13:50		Office Hour		Office Hour	Linear Algebra (CDS) T7-503
14:00 - 14:50		Linear Algebra I (STAT) T29-602			Office Hour
15:00 - 15:50		Linear Algebra I (STAT) T29-602			Linear Algebra I (STAT) T4-603
16:00 - 16:50		Office Hour			Office Hour

Textbook

- Linear Algebra with Applications
  - Eighth/Nineth Edition by **Steven J. Leon**

Assessment

13. ASSESSMENT METHODS (AMS)

Type of Assessment Methods	Weighting	CILOs to be addressed	Description of Assessment Tasks
Assignments	20%	1-4	Assignments will test the students' understanding on theories and ability to use theories to solve problems.
Class exercises	20%	1-2	Exercises will test the students' understanding on theories which are just taught by teachers.
Projects	20%	1-4	Projects will test students ability to use some basic tools to solve some simple but practical problems.
Final examination	40%	1-4	The final examination will check how well the students understand the basic theories in this course and apply the theories to the real problems.

Assignments

- Individual assignments weekly
  - Written questions
  - Do not collaborate with other students
  - The deadline is non- negotiable
  - Late submission will get a **penalty**

Late Submission	Mark Reduction
$\leq$ 12 hrs	20%
$\leq$ 24 hrs	40%
$>$ 1 day	100%

- Academic honesty
  - Copying assignments will get a **ZERO** grade

What is linear algebra?

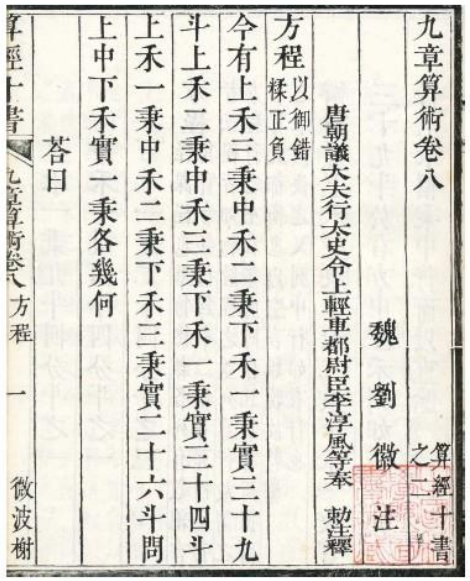

- **Linear algebra** is a branch of mathematics concerned with the study of vectors, with families of vectors called *vector spaces* or *linear spaces*, and with functions that input one vector and output another, according to certain rules.

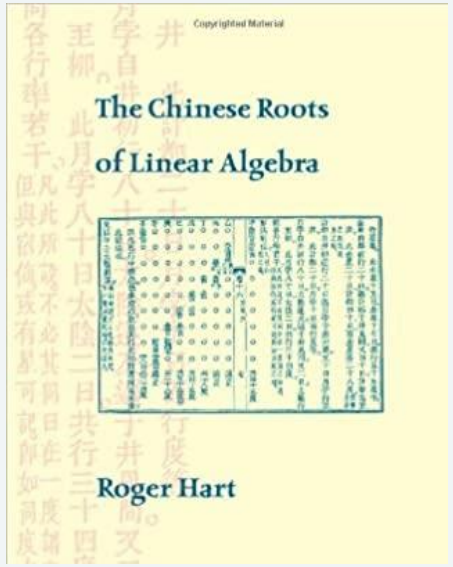

- **Linear algebra** is central to modern mathematics and its applications.

Example of systems of equations

Liu Hui
3rd Century AD

Problem 1, Chapter 8 of Jiu Zhang Suan Shu

$$\begin{cases} 3x+2y+z=39 \\ 2x+3y+z=34 \\ x+2y+3z=26 \end{cases}$$

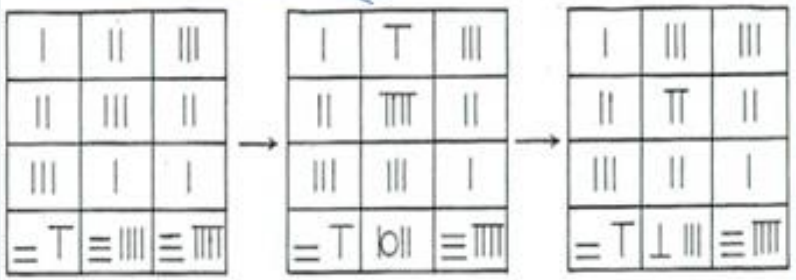

Example of systems of equations

$$\begin{cases} 3x+2y+z=39 \\ 2x+3y+z=34 \\ x+2y+3z=26 \end{cases}$$

1,2,3,4,5,6,7,8,9

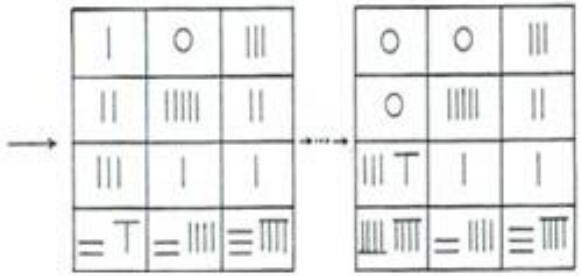

1	2	3
2	3	2
3	1	1
26	34	39

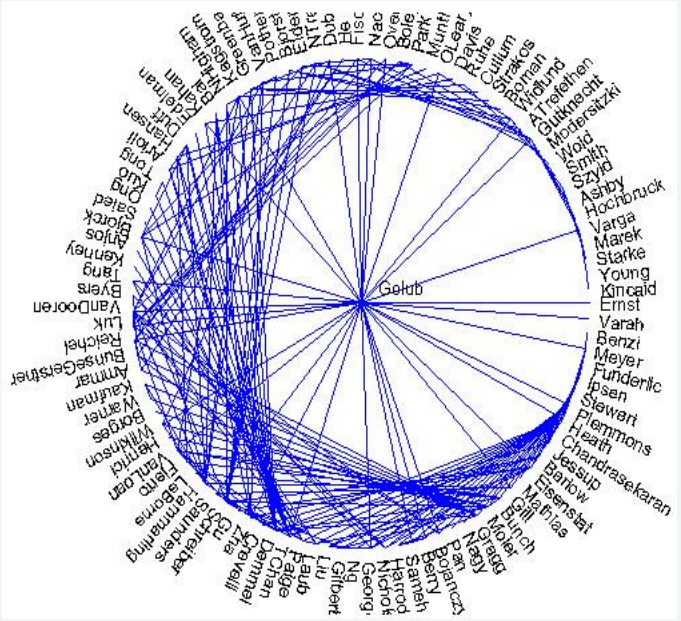

0	0	3
4	5	2
8	1	1
39	24	39

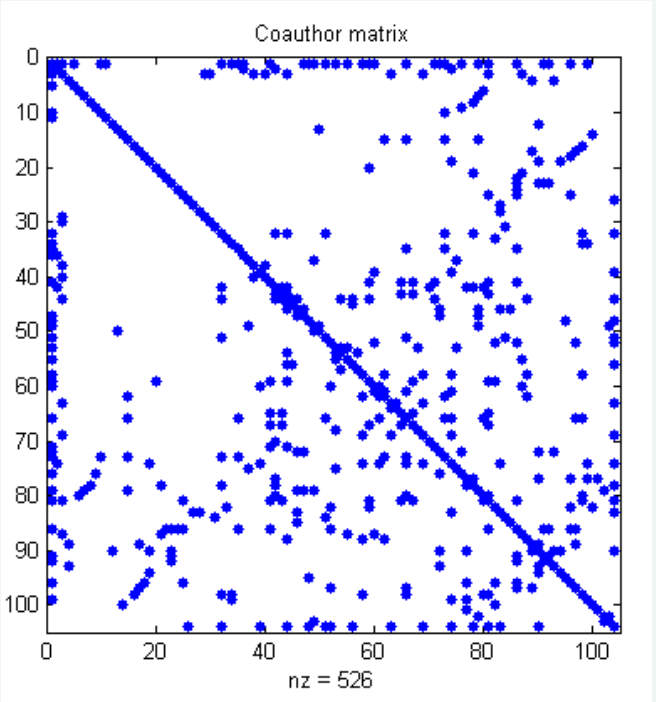

0	0	3
0	5	2
36	1	1
99	24	39

Singular Value Decomposition

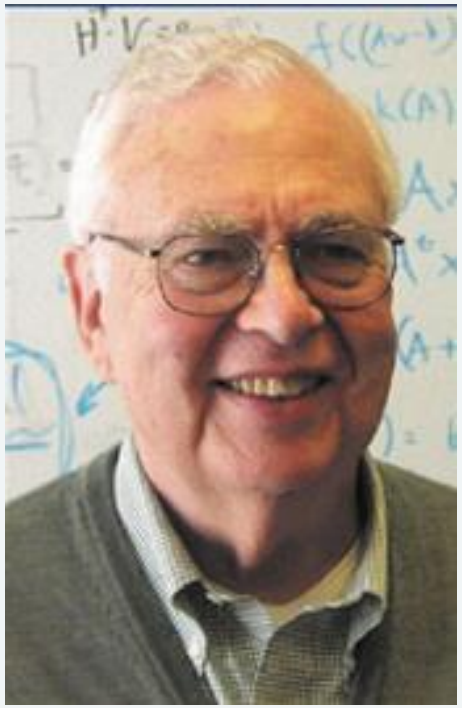

SIAM REVIEW
Vol. 46, No. 3, pp. 518–545

© 2004 Society for Industrial and Applied Mathematics

Singular Value Decomposition, Eigenfaces, and 3D Reconstructions*

Linear Algebra is the foundation of data science and AI!

How to learn Linear Algebra?

- **Preview before attending each class;**
- **Have a pencil and scratch paper ready. Practice on what you are reading. *Mathematics is not read like a novel* ;**
- **Make sure you understand the methods for solving the examples done in class; "*If you can't explain it, you don't understand it*".**
- **Identify ideas that were discussed in the lectures and work out the additional examples presented in the book.**
- **Finish your homework carefully on time.**

Study Tips

- Attend **ALL** the classes!
- Read (and sometimes write) the lecture notes.
- Spend at least 3 out-of-class hours each week.
- Use the discussion group on iSpace, Wechat.
- Complete the assignments individually.
- All in all, work hard!
- And have fun!
